AFNAN RAFID

Analytics | Business Technology | Technology Risk

Norman, OK | arafid@ou.edu | arafid.github.io | linkedin.com/in/arafid | github.com/arafid

EDUCATION

University of Oklahoma, Michael F. Price College of Business
M.S. in Management Information Technology | Expected May 2028 | GPA 4.00
Bachelor's in Management Information Systems and Economics | Double major | May 2026
Davis UWC Scholar | GPA 3.89 | Major GPA 4.00 | Magna Cum Laude

TECHNICAL SKILLS

Analytics: Python (pandas, NumPy, NLTK, Matplotlib), SQL, Power BI, Excel/VBA, Stata
Applications & data: C#, object-oriented programming, REST APIs, JSON, Git/GitHub, SQL Server, Azure SQL, MongoDB
Cloud & risk: AWS Cloud Foundations (IAM, S3, EC2, VPC), cyber risk assessment, NIST CSF, Zero Trust, PAM, third-party risk, AI governance

SELECTED PROJECTS

Love's Customer Campaign & Segmentation Analytics | Academic case competition

- Integrated five datasets covering 20,000 drivers, 409K campaign records, 2.45M product-sales records, and 700 stores; validated keys and engineered campaign, engagement, and sales KPIs.
- Identified MediumDiscount as the strongest engagement segment (20.95% join rate; 29.99% achieve rate) and recommended behavior-based targeting and A/B tests.

Amazon Review Analytics | Academic team project

- Built a reproducible Python/NLTK workflow on a balanced 300-review sample from 568,454 reviews, using VADER, text preprocessing, complaint-theme classification, and product aggregation.
- Evaluated failure cases: 48.67% agreement with star-derived labels and 5% neutral agreement; documented limitations and the need for human judgment.

Equifax Cybersecurity Risk & Resilience Assessment | Academic team project

- Presented four 12-month planning ranges and their reasoning, connecting cyber exposure, business impact, control maturity, assumptions, and uncertainty.
- Contributed to a team 36-month roadmap for Zero Trust, PAM, resilience, third-party risk, and AI governance.

C# Weather API Console Application | Individual course project

- Built a .NET console app using asynchronous HTTP requests, JSON response classes, weather-code interpretation, and unit conversion to report Open-Meteo conditions.

EXPERIENCE

Graduate Teaching Assistant | University of Oklahoma, Price College | Fall 2026 - Present

- Support C# OOP through labs, code review, debugging, office hours, and grading; evaluate application behavior against rubric and acceptance-test requirements.

Student Assistant | OU Office of Student Conduct | Fall 2023 - Spring 2026

- Maintained sensitive case records in Maxient and supported documentation, accuracy, and confidentiality procedures.

Global Operations Intern | Youth Opportunities, Dhaka | Fall 2019

- Assessed applications, interviewed candidates, and supported recruitment of approximately 30 Global Ambassadors across six continents.
